

Eastern Black & White Colobus Monkey

Habitat: Deciduous and evergreen thicket forests

Size: 18-27 inches long and approximately 11 to 30 pounds

Life Span: Median life expectancy is 15 years for females and 19 years for males.

Conservation Status

Extinct

Extinct in the wild

Critically Endangered

Endangered

Vulnerable

Near Threatened

Least Concern

Due to:
Hunted for bush meat and their incredible fur.
Habitat loss is a concern too.

Diet: Fruits, leaf buds, bark, seeds, and blossoms complement their diet of leaves.

Reproduction: One baby is born after about 6 ½ months

Did You Know?

Colobus monkeys have a multi-chambered stomach that allows for the digestion of large amounts of foliage.
Colobus do not have thumbs like other primates
